

COMPOSE® CONNECTIONS™

As organizations shift from individual workspaces to more collaborative spaces, it's important to support people's needs for choice and user control in the workspace. Compose Connections is a spine-based system that pivots from the dimensional logic of Compose systems and Integrated Palette™ elements to create an exceptionally flexible solution for today's ever-changing work environment. It is designed to optimize the efficiency and reconfigurability of spine-based planning paradigms by decoupling the utility infrastructure from the worksurface components.

Haworth Design Studio

Drawing from resources and knowledge around the world, the Haworth Design Studio collaborates with research and development partners to identify, develop, and launch new and breakthrough innovations. With design centers in three key locations—China, Germany, and the United States—the team focuses on creating multi-generational products and global platforms designed with regional needs and preferences in mind.

COMPOSE® CONNECTIONS™

- + Power and data are easily accessible from the spine, so people can move from task to task without wasting time seeking connection ports.
- + Compose Connections can be freestanding—so your power path doesn't have to follow placement of tables. It's an efficient way to supply power and data in an open plan.
- + Compose Connections lets you arrange height-adjustable, fixed height, and mobile tables in a variety of collaborative or touchdown applications to address ergonomic and workstyle needs.
- + With so many workstation options, individuals have greater user control over their workspace.
- + Haworth's Active Components™, X Series® storage components, and Belong™ accessories physically connect and integrate with Compose Connections, providing choices for people to stow and organize personal items and work materials.
- + Space planners have the convenience to plan like a system application, with the open look and feel of desking.
- + The Intuity™ rail with functional top cap offers a 2-inch inset to support worksurfaces—both individual and common tops.
- + The Work Rail offers a robust inset to support worksurfaces—both individual and common tops, the Intuity™ screens, and elements of the Active Components product line.
- + Compose Connections is raised up off the floor like a post-and-beam system, presenting a more progressive look—for a subtle, light scale transition from a traditional panel environment.
- + As part of Haworth's Integrated Palette™, Compose Connections provides an adaptable kit of parts that physically connects and integrates with other Haworth product platforms to support organizations' needs for design freedom and future assurance.

Statement of Line

- Compose Connections introduces a number of fresh new components to the Compose product line that allow a variety of relevant and flexible applications.

Finishes

- Leverages Compose finish logic.
